EDUCATION

University of Victoria | MEng, Applied Data Science (Co-op) *Victoria, BC | Sep 2025 - Dec 2027*

- **Coursework:** Optimization for Machine Learning, Systems for Massive Datasets. **GPA:** 8.78 / 9.00.

University of Chicago | MS, Computer Science *Chicago, IL, USA | Sep 2020 - Mar 2022*

- **Coursework:** Distributed Systems, Databases, Discrete Mathematics, Applied Software Engineering.

University of Washington | BS, Economics *Seattle, WA, USA | Sep 2015 - Aug 2019*

- **Minors:** Applied Mathematics, Informatics. **GPA:** 3.57 / 4.00.

EXPERIENCE

Software Developer | T-Mobile (via BeaconFire Inc.) *Bellevue, WA, USA | Jun 2022 - Apr 2024*

- Automated reprocessing of rejected roaming tests with weekly Kafka retries, cutting manual effort by 80%.
- Owned REST endpoints on 5+ Java and Spring Boot roaming services, holding Cassandra reads under 1 second.
- Traced 20+ cross service defects to their root cause and shipped fixes via Jenkins across 50+ releases.
- Debugged production issues in Splunk and documented systems and runbooks so the work survived handover.

Math and Computer Science Teacher | APU American International Schools *Da Nang, Vietnam | Aug - Dec 2024*

- Taught Python, algorithms, object oriented design and software engineering fundamentals to 50+ students.
- Led coding projects spanning debugging, algorithmic reasoning and software performance optimization.

PROJECTS

Multi-Stage IoT Intrusion Detection | Python, XGBoost, PyTorch *UVic Capstone, team of 7 | May - Aug 2026*

- Compared six supervised classifiers on 206,000 CIC IoT-DIAD 2024 flows with preprocessing fit on training only.
- Selected binary XGBoost under a 1% false positive budget, reaching 99.5% recall at 0.94% FPR and 0.989 PR-AUC.
- Designed a four condition holdout that exposed capture session leakage, dropping PR-AUC from 0.981 to 0.125.

Ocean Data ML Platform with RAG | Python, Spark, XGBoost, Qdrant, FastAPI *Personal Project | Feb - Mar 2026*

- Harmonized 10.8 million NOAA and Ocean Networks Canada records into validated layers with full source tracing.
- Cut air temperature forecast error 48% at 12 hours with the same pipeline a naive baseline beat on water.
- Tested Qdrant with held out queries covering every document, reaching 90% retrieval success and 85% term recall.

Fuel Blending Prediction Service | Python, CatBoost, FastAPI, AWS *Shell.ai Hackathon 2025 | Jul 2025*

- Built and deployed multi output regression across 10 blend properties through FastAPI on Dockerized AWS EC2.
- Benchmarked CatBoost against XGBoost under 5 fold cross validation and shipped it at 0.64 MAPE against 1.29.
- Engineered entropy based mixture metrics and serialized preprocessing so training and inference stay consistent.

Automated Crypto Trading Bot | Python, Coinbase API, AWS, pandas *Personal Project | Feb - Jul 2025*

- Implemented a mean reversion engine that buys 1% dips and sells on 2% rises inside rolling 60 minute windows.
- Added a trend strategy that buys only when the 8 period EMA is above the 20 and price is above the 200 EMA.
- Backtested both on four months of polled data, then deployed to AWS EC2 with per market caps from a CSV config.

TECHNICAL SKILLS

Languages & Programming: Python, Java, SQL, Go, JavaScript, Cypher, MATLAB, object oriented programming

Machine Learning & Evaluation: PyTorch, XGBoost, CatBoost, scikit-learn, pandas, NumPy, Optuna, MLflow

Data, Retrieval & Messaging: Spark, PySpark, ETL, Qdrant, RAG, embeddings, vector search, Cassandra, Kafka

Backend, Cloud, CI/CD & Testing: Spring Boot, FastAPI, REST, Docker, AWS (EC2, S3, Lambda), Jenkins, pytest

Credentials: Google Advanced Data Analytics (2025); Shell.ai Hackathon 2025; IMC 64 Bids, top 250 of 1,500
